Inside your packet you will find a brochure containing important information about the different possible sites for migraine surgery. Please read this information before you begin to fill out the paperwork. Each patient has a different combination of sites for migraine surgery. Our team relies on the information you provide, so please be specific when completing the paperwork in this packet.

Step 1: Fill out the migraine log for 4 weeks

This log helps you to begin to really focus where the migraine pain starts. You will need to try and identify where the pain begins and where the pain travels. The symptoms you experience and the environmental conditions on the day you have the migraine headache are very important in order to see the overall picture of your headaches.

Step 2: Fill out the Pre-Treatment form

Use the migraine log to report the specific information about your headaches. You may even begin to see a pattern to your headaches. Please use this form to provide additional information that does not fit on the migraine log.

Step 3: Fill out the history and physical form

Please be specific about any health issues you may have other than your migraine headaches. Provide a list of the **prescription and non-prescription medications** you are taking, including vitamins and supplements. Please include the dosage and how frequently you take these medications.

Step 4: Fill out the Functional nose form

Please pay attention to the question asked. For example, you may not have noticed that you breathe through your mouth instead of your nose. Your close friends and family members may be able to help by watching your daily habits and functions.

Once you have completed the paperwork, please fax, email or mail the information to our office:

**456 N. New Ballas Rd. Suite 290
Creve Coeur, MO. 63141
Fax: 314-432-2265
E-Mail: genesis@genesiscosmeticsurgery.net**

If a CT scan has been advised, please bring the films or disc with you on the day of your appointment.
